ZP	ZONE	---	

Please Note:  
 Floor levels inside the stables were unobtainable due to thick layers of straw and debris.  
 Due to the inherent nature of the site, some areas were inaccessible due to stock, machinery or other obstacles. Where this is the case, reflectorless/non contact methods of surveying may have been used. Although all due care and attention has been given any critical measurements should be double checked.

All brick door and window openings have been shown using a - - - - line. For structural opening heights please see Elevation drawings. (Drawing No:xxxx)
